**RECOMMENDATION LETTER**

This letter is a reference to **Mr. Frezer Belay** I have known Frezer as my student in Gondar university mechanical engineering department. I was his advisor during the final year senior project work entitled with **“Design and Static Analysis of Egg Grader Machine”**. In the time when I advised him, he was creative, eager to know new things and he was also an active participant during discussions of the project work.

As a teacher, I have had a pleasure of knowing Frezer for the last two years at which he has performing his best in teaching – learning process. He is confident in doing things well, creative to solve problems easily, honest and hard worker. His discipline and the ability to communicate with staff and students of the community can be taken as a model for other students. Ended I can say he is an outstanding student and an asset for our department just by referring his performance as a student since I have been there in the department as a teacher.

I feel positive that he will continue to succeed in his work. He has shown me he can perform better academically and working his senior project with his team mate which can really solve community problem. His relationship with his team mate and advisor was also very good.

I, as a teacher, acknowledge him for what he has proven hard working, cooperation, voluntary works and good behaving are. If you have questions regarding for this recommendation, don't hesitate to contact me.

Sincerely!

Mr. Teferi Sitotaw

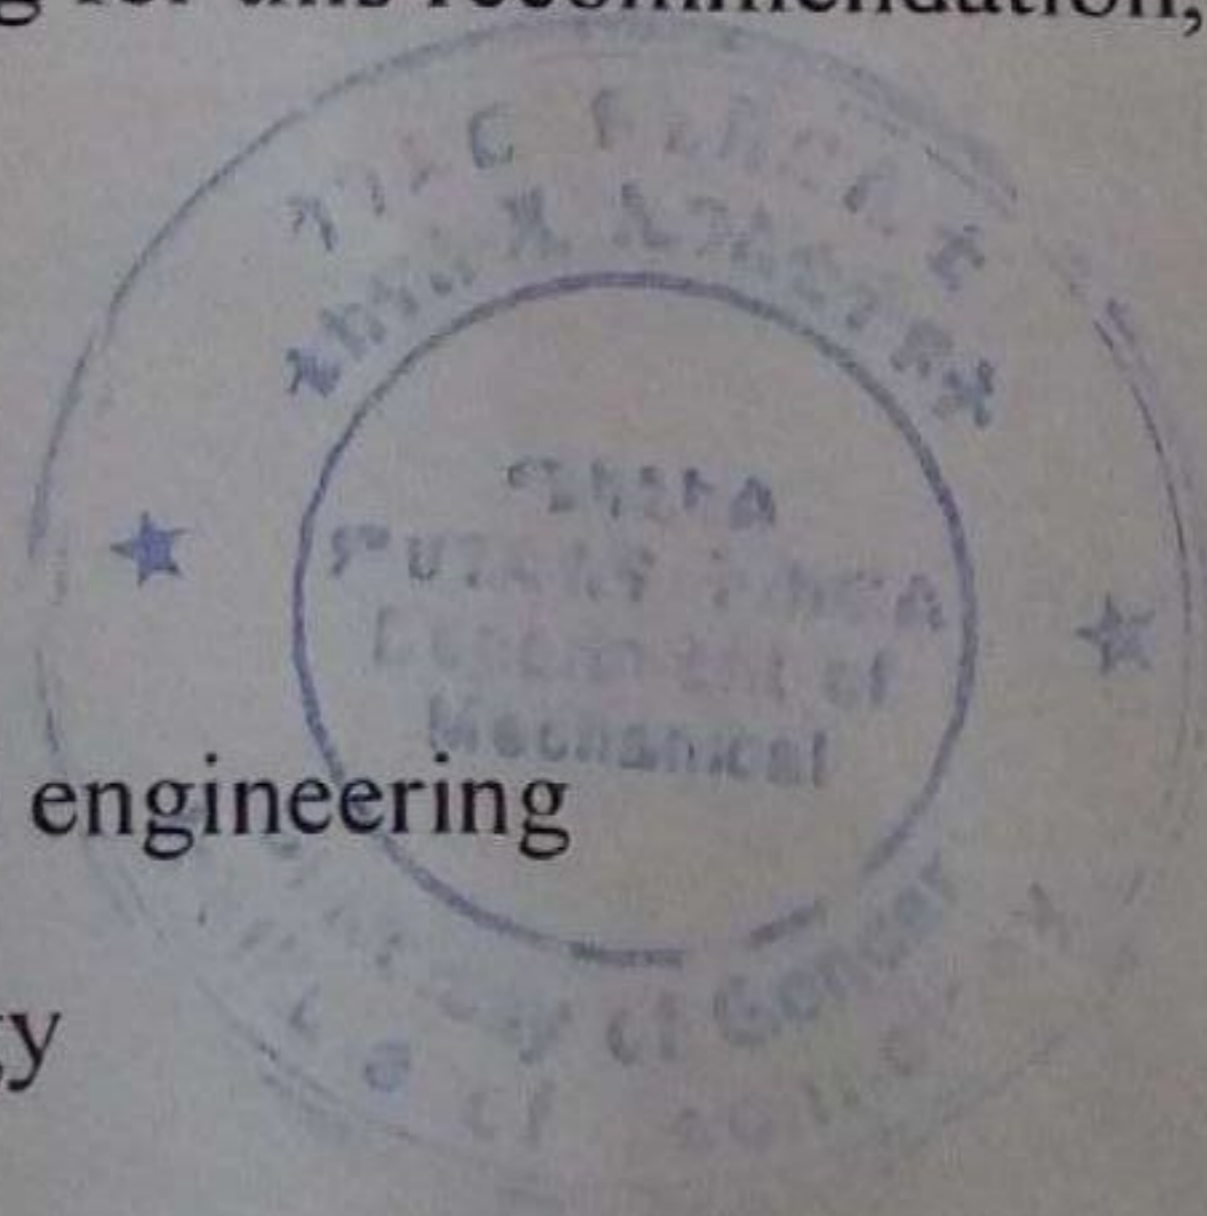

Senior Lecturer in department of mechanical engineering
